

## **Leadership Project Event Overview**

The leadership project focuses on the Tenacity team organizing with other students to mobilize change within the school community.

Teams are asked to identify a problem or issue within their school community. Beginning October 1st, Tenacity team members must devise and enact a plan to raise awareness and educate their community on the issue. The issue may be anything of importance to the team; including, but not limited to a social, environmental or political concern. The plan must include action steps to not only raise awareness, but also steps that may be taken to address this challenge. It is important to note that not all steps to “solve” or address the issue must be taken prior to the creation of the presentation of the project and the overall purpose is not to “solve” the issue. Students will design a leadership plan for next steps in furthering positive change related to the theme of their project to empower their community.

Students are required to create a presentation for the day of the Tenacity Challenge. The presentation may be in the form of a 2D or 3D installation, PSA or an artistic mural; however, it must contain:

1. A description of and rationale for why the topic was chosen
2. A description of what steps were taken to raise awareness and/or address the issue
3. A description of the challenges faced during the development and implementation process
4. A reflection on what impact was made on the school community and/or school culture as a result of the leadership project. What evidence will show some quantitative or qualitative way to analyze impact?
